SKILLS

- Web Dev: **MERN STACK**
- Cloud Services: **AWS**
- OS Platforms: **Linux (Ubuntu, CentOS, AWS Linux)**
- Deployment tools: **Jenkins & GitLab**
- Database: **MySQL & Mongo**
- Role: **React Developer**
- Web Servers: **Apache2 & Node**

EDUCATION

- **Bachelor of Computer Applications** (**IGNOU**) – New Delhi [2019 - 2023]
- **Diploma** in **Software Engineering** - **NIIT** New Delhi [2019 - 2022]

EXPERIENCE

- **DevOps** | **Techme24x7**   [Feb 2022 – June 2023]
  I have experience working with **AWS Cloud Services**, specialising in IAAS and DevOps tools such as **Jenkins**, **GitLab**, **Virtual Machines**, **Apache2 Servers**, **Tomcat Servers**, and **Node Servers**. I have successfully set up **MySQL server replication** and worked on **live streaming**, **recorded video streaming**, and **infrastructure monitoring setups**.

- **Web Dev && Cloud Support Eng.** | **codxia.com**   [Jan 2024 – Present]
  I've spent two months mastering React with **Redux**, **Hooks**, **Components**, and Node.js for creating a **Mediatranscoding web app**, enabling video uploads to **S3** and transcoding to **M3U8** using **AWS MediaConvert**.

PROJECTS

- **Project:** E-learning Cloud Platform
  Client: Allen Plus, **Madeeasy** and **Gingerwebs Noida**
  Environment: Ubuntu 20.04, AWS Cloud (EC2, ELB, S3, Route 53, VPC), Shell Scripting, MYSQL.

- **Project: Nextias.com** Media Services Migration && **Monitoring Setup**
  Client: Madeeasy
  Environment: Aws Services [Media Convert, Cloud Front, Media Package, Media Live, S3 Bucket], Grafana, Prometheus, Node Exporter, & Cloud Watch with Slack and Mail Notification

- **Project:** React Dynamic To-Do App
  Environment: React, Express, PostgreSQL, Ubuntu Server 22.04
  Academic Project

- **Project:** Synergetic && Media Upload and Media Transcoding
  Environment: React, Redux, Redux-saga, Node js, Express js
